

#### **Data Validation Checklist Inorganic Analyses**

Project:	35 <sup>TH</sup> Avenue Superfund Site	Project No: 1	15268508,20000
Laboratory:	TestAmerica - Savannah, GA	Job ID.:	680-89896-2
Method:	SW-846 6010C and 7471B, and EPA 200.7 and 245.1	Associated Sample	es: Refer to Attachment A (Sample Summary)
Matrix:	Soil and Water	Date Collected:	04/29/2013 - 05/01/13
Reviewer:	Karen Marie Trujillo, URS Group, Inc.	Date:	05/28/13
Concurrence <sup>1</sup> :	Martha Meyers-Lee, URS Group, Inc.	Date:	05/30/13

	Review Questions	Yes	No	N/A	Samples (Analytes) Affected/Comments	Flag
1.	Were sample preservation requirements met? If pH of aqueous	✓				
	sample >2 and was not adjusted by laboratory prior to analysis,					
	J- flag positive results and R- flag non-detect results.					
2.	Were all COC records signed and integrity seals intact,	✓				
	indicating that COC was maintained for all samples?					
3.	Were there any problems noted in laboratory data package		✓			
	concerning condition of samples upon receipt?					
4.	Do any soil/sediment samples contain more than 50% water? If		✓			
	yes, then results are to be reported on a wet-weight basis.					
5.	Have any technical holding times, determined from date of		✓			
	collection to date of analysis, been exceeded? (Hg: ≤28 days,					
	other metals: $\leq$ 6 months). If not, then J- flag positive results					
	and R- flag non-detect aqueous results.					
6.	Were results for all project-specified target analytes reported?	✓				
7.	Were project-specified Reporting Limits achieved for undiluted		✓		The MDL (0.59 mg/Kg) for arsenic is greater	
	sample analyses?				than the Resident Soil RSL (0.39 mg/Kg). A	
					RSL does not exist for total chromium; however,	
					the total chromium MDL (0.5 mg/Kg) is greater	
					than the hexavalent chromium Resident Soil RSL	
_					(0.29 mg/Kg).	
8.	Were method blank (MB) prepared at the appropriate frequency (one per 20 samples, batch, matrix, and level)?	✓				
9.	Was a calibration blank (ICB/CCB) analyzed at the beginning,	<b>✓</b>				
	after every 10 <sup>th</sup> sample, and at the end of each analytical run?					
10.	Were target analytes detected in the method and/or calibration		✓		Target analytes were not detected in the method	
	blanks?				blanks. Calibration blanks were not evaluated.	

<sup>&</sup>lt;sup>1</sup> Independent technical reviewer

Review Questions	Yes	No	N/A	Samples (Analytes) Affected/Comments	Flag
11. Were target analytes reported in equipment/rinsate blanks analyses above the DL?	105	¥	IVI	According to the QAPP, a rinsate blank is to be collected after each decontamination event, which occurs once per week per the client. Rinsate blank 050113-RB-Bowls&Spoons (680-89896-23) was collected during the week of 4/29/2013. Target analytes were not detected during the EPA Methods 200.7 and 245.1 analyses of the rinsate blank, and all results were reported under this Test America Job ID.	Img
12. Were contaminants detected in samples below the blank contamination action level?  o If blank result > RL,  • Flag sample results ≤ RL with a U  • Flag positive sample results > RL and ≤10x blank result, as J+ positive results  o If blank result ≤RL,  • Flag sample results ≤ RL with a U  • Flag positive sample results > RL and <10x blank result, as J+ positive results			<b>√</b>	Method and rinsate blank contamination does not exist.	
13. Are there negative laboratory blank results with the absolute value ≤RL? If yes, then flag positive and non-detect sample results that are < 10x absolute blank value as J- and UJ, respectively.		<b>~</b>			
<ul><li>14. Was a field duplicate analyzed?</li><li>15. Was precision deemed acceptable as defined by the project plans?</li></ul>	<b>&gt;</b>		~	Field duplicate sample CV0988A-CSD (680-89896-18) was analyzed for metals by SW-846 Methods 6010C and 7471A; however, an evaluation of field imprecision is not possible, because the primary sample CV0988A-CS was not subject to a metals analysis per the COC record.	
<ul> <li>16. contents or attach a copy of the narrative.					

Comments: The data validation was conducted in accordance with the Non-Industrial Use Property Sampling Event QAPP for the 35th Avenue Removal Site, Birmingham, Alabama, Revision 1 (OTIE, October 2012). The data review process was modeled after the USEPA Contract Laboratory Program (CLP) National Functional Guidelines (NFG) for Inorganic Data Review (EPA 540-R-04-004, October 2004). Sample results have been qualified based on the results of the data review process (Attachment C). Criteria for acceptability of data were based upon available site information, analytical method requirements, guidance documents, and professional judgment.

#### **DV Flag Definitions:**

Job ID.: <u>680-89896-2</u>

- J- The result is an estimated quantity, but the result may be biased low.
- J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+ The result is an estimated quantity, but the result may be biased high.
- R The data are unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.
- U The analyte was analyzed for, but was not detected above the associated level; blank contamination may exist.
- UJ The analyte was analyzed for, but was not detected. The reported limit is approximate and may be inaccurate or imprecise.

Narrative

#### **CASE NARRATIVE**

Client: Oneida Total Integrated Enterprises LLC

**Project: 35th Avenue Superfund Site** 

Report Number: 680-89896-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

#### RECEIPT

The samples were received on 05/02/2013; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.3 C.

#### METALS (ICP)-Water

Sample 050113-RB-Bowls&Spoons (680-89896-23) was analyzed for Metals (ICP) in accordance with EPA Method 200.7. The samples were prepared on 05/06/2013 and analyzed on 05/07/2013.

No difficulties were encountered during the metals analysis.

All quality control parameters were within the acceptance limits.

#### **TOTAL MERCURY-Water**

Sample 050113-RB-Bowls&Spoons (680-89896-23) was analyzed for total mercury in accordance with EPA Method 245.1. The samples were prepared on 05/07/2013 and analyzed on 05/08/2013.

Mercury recovered outside the recovery criteria for the MS/MSD of sample 680-89934-1 in batch 680-276087.

Mercury also exceeded the rpd limit for the MSD of sample 680-89934-1 in batch 680-276087.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

No other difficulties were encountered during the mercury analysis.

All other quality control parameters were within the acceptance limits.

#### METALS (ICP)

Samples CV0731A-CS-SP (680-89896-4), CV0662A-CS-SP (680-89896-6), CV0988A-CSD (680-89896-18), CV0662A-CS-SP (sieve) (680-89896-20), CV0731A-CS-SP (sieve) (680-89896-21) and CV0988A-CS-SP (sieve) (680-89896-22) were analyzed for Metals (ICP) in accordance with EPA SW-846 Method 6010C. The samples were prepared on 05/06/2013 and analyzed on 05/08/2013.

Several analytes recovered outside the recovery criteria for the MS/MSD of sample CV0731A-CS-SP (680-89896-4) in batch 680-275916. Also, Arsenic, Barium and Lead exceeded the rpd limit.

#### Job ID: 680-89896-2 (Continued)

#### Laboratory: TestAmerica Savannah (Continued)

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

#### **TOTAL MERCURY**

Samples CV0731A-CS-SP (680-89896-4), CV0662A-CS-SP (680-89896-6), CV0988A-CSD (680-89896-18), CV0662A-CS-SP (sieve) (680-89896-20), CV0731A-CS-SP (sieve) (680-89896-21) and CV0988A-CS-SP (sieve) (680-89896-22) were analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared on 05/08/2013 and analyzed on 05/10/2013.

Mercury recovered outside the recovery criteria for the MS of sample CV0731A-CS-SPMS (680-89896-4) in batch 680-276327.

No other difficulties were encountered during the mercury analyses.

All other quality control parameters were within the acceptance limits.

#### **CASE NARRATIVE**

Client: Oneida Total Integrated Enterprises LLC

**Project: 35th Avenue Superfund Site** 

Report Number: 680-89896-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

#### **RECEIPT**

The samples were received on 05/02/2013; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.3 C.

#### METALS (ICP)-Water

Sample 050113-RB-Bowls&Spoons (680-89896-23) was analyzed for Metals (ICP) in accordance with EPA Method 200.7. The samples were prepared on 05/06/2013 and analyzed on 05/07/2013.

No difficulties were encountered during the metals analysis.

All quality control parameters were within the acceptance limits.

#### **TOTAL MERCURY-Water**

Sample 050113-RB-Bowls&Spoons (680-89896-23) was analyzed for total mercury in accordance with EPA Method 245.1. The samples were prepared on 05/07/2013 and analyzed on 05/08/2013.

Mercury recovered outside the recovery criteria for the MS/MSD of sample 680-89934-1 in batch 680-276087.

Mercury also exceeded the rpd limit for the MSD of sample 680-89934-1 in batch 680-276087.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the sp king amount.

No other difficulties were encountered during the mercury analysis.

All other quality control parameters were within the acceptance limits.

#### **METALS (ICP)**

Samples CV0731A-CS-SP (680-89896-4), CV0662A-CS-SP (680-89896-6), CV0988A-CSD (680-89896-18), CV0662A-CS-SP (sieve) (680-89896-20), CV0731A-CS-SP (sieve) (680-89896-21) and CV0988A-CS-SP (sieve) (680-89896-22) were analyzed for Metals (ICP) in accordance with EPA SW-846 Method 6010C. The samples were prepared on 05/06/2013 and analyzed on 05/08/2013.

Several analytes recovered outside the recovery criteria for the MS/MSD of sample CV0731A-CS-SP (680-89896-4) in batch 680-275916. Also, Arsenic, Barium and Lead exceeded the rpd limit.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

#### **TOTAL MERCURY**

Samples CV0731A-CS-SP (680-89896-4), CV0662A-CS-SP (680-89896-6), CV0988A-CSD (680-89896-18), CV0662A-CS-SP (sieve) (680-89896-20), CV0731A-CS-SP (sieve) (680-89896-21) and CV0988A-CS-SP (sieve) (680-89896-22) were analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared on 05/08/2013 and analyzed on 05/10/2013.

Mercury recovered outside the recovery criteria for the MS of sample CV0731A-CS-SPMS (680-89896-4) in batch 680-276327.

No other difficulties were encountered during the mercury analyses.

All other quality control parameters were within the acceptance limits.

#### **DATA REPORTING QUALIFIERS**

Client: Oneida Total Integrated Enterprises LLC

Job Number: 680-89896-2

Sdg Number: 68089896-2

Lab Section	Qualifier	Description
Metals		
	U	Indicates the analyte was analyzed for but not detected.
	F	MS or MSD exceeds the control limits
	4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	F	RPD of the MS and MSD exceeds the control limits

Client: Oneida Total Integrated Enterprises LLC

Job Number: 680-89896-2 Sdg Number: 68089896-2
